

# Online Teaching, E-Administration and Computerisation in the University

**Prof. M.O.H. Amuda**

*Director, Adetokunbo Babatunde Sofoluwe Centre for Information  
Technology and Systems (ABS-CITS)*

*A-presentation at the 2023 Workshop for Deans, Designated Directors, Heads of Department, Deputy Registrar organised by the University at the Academic Publishing Centre, University of Lagos, on Tuesday, August 22, 2023.*

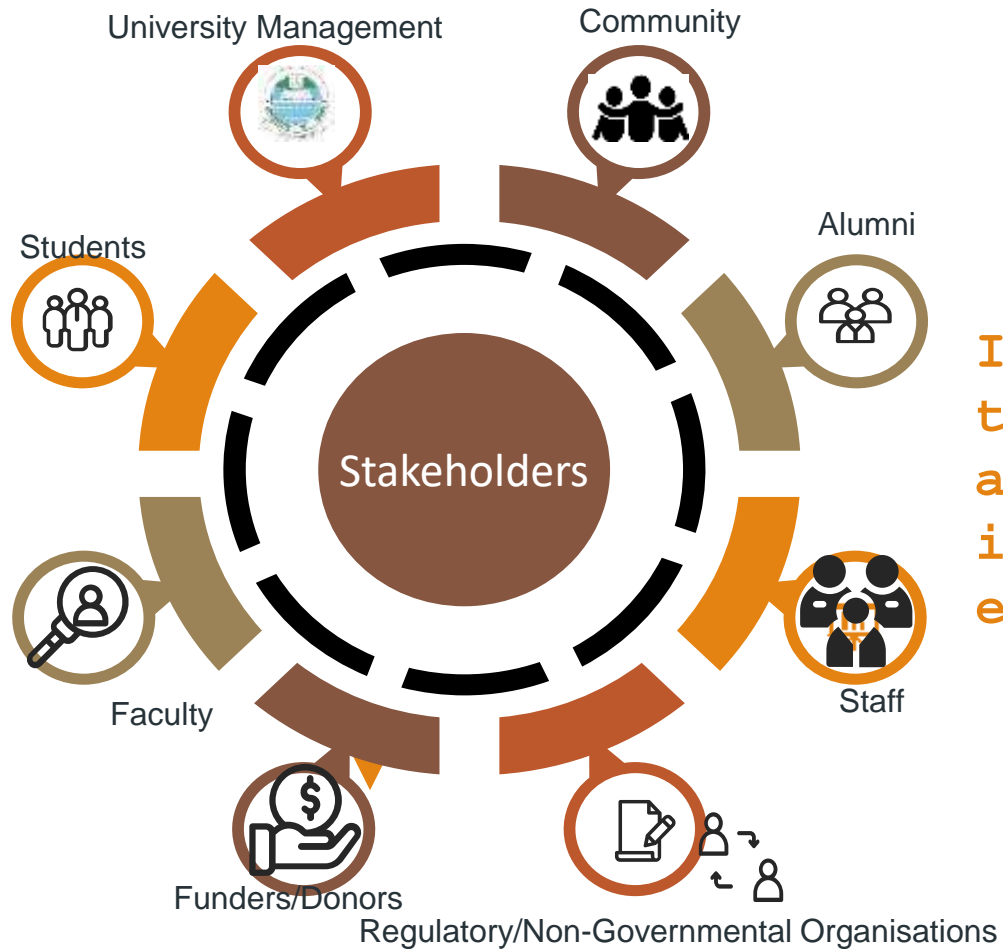

**UNIVERSITY OF FIRST CHOICE AND THE NATION'S PRIDE**

## Contents of Presentation

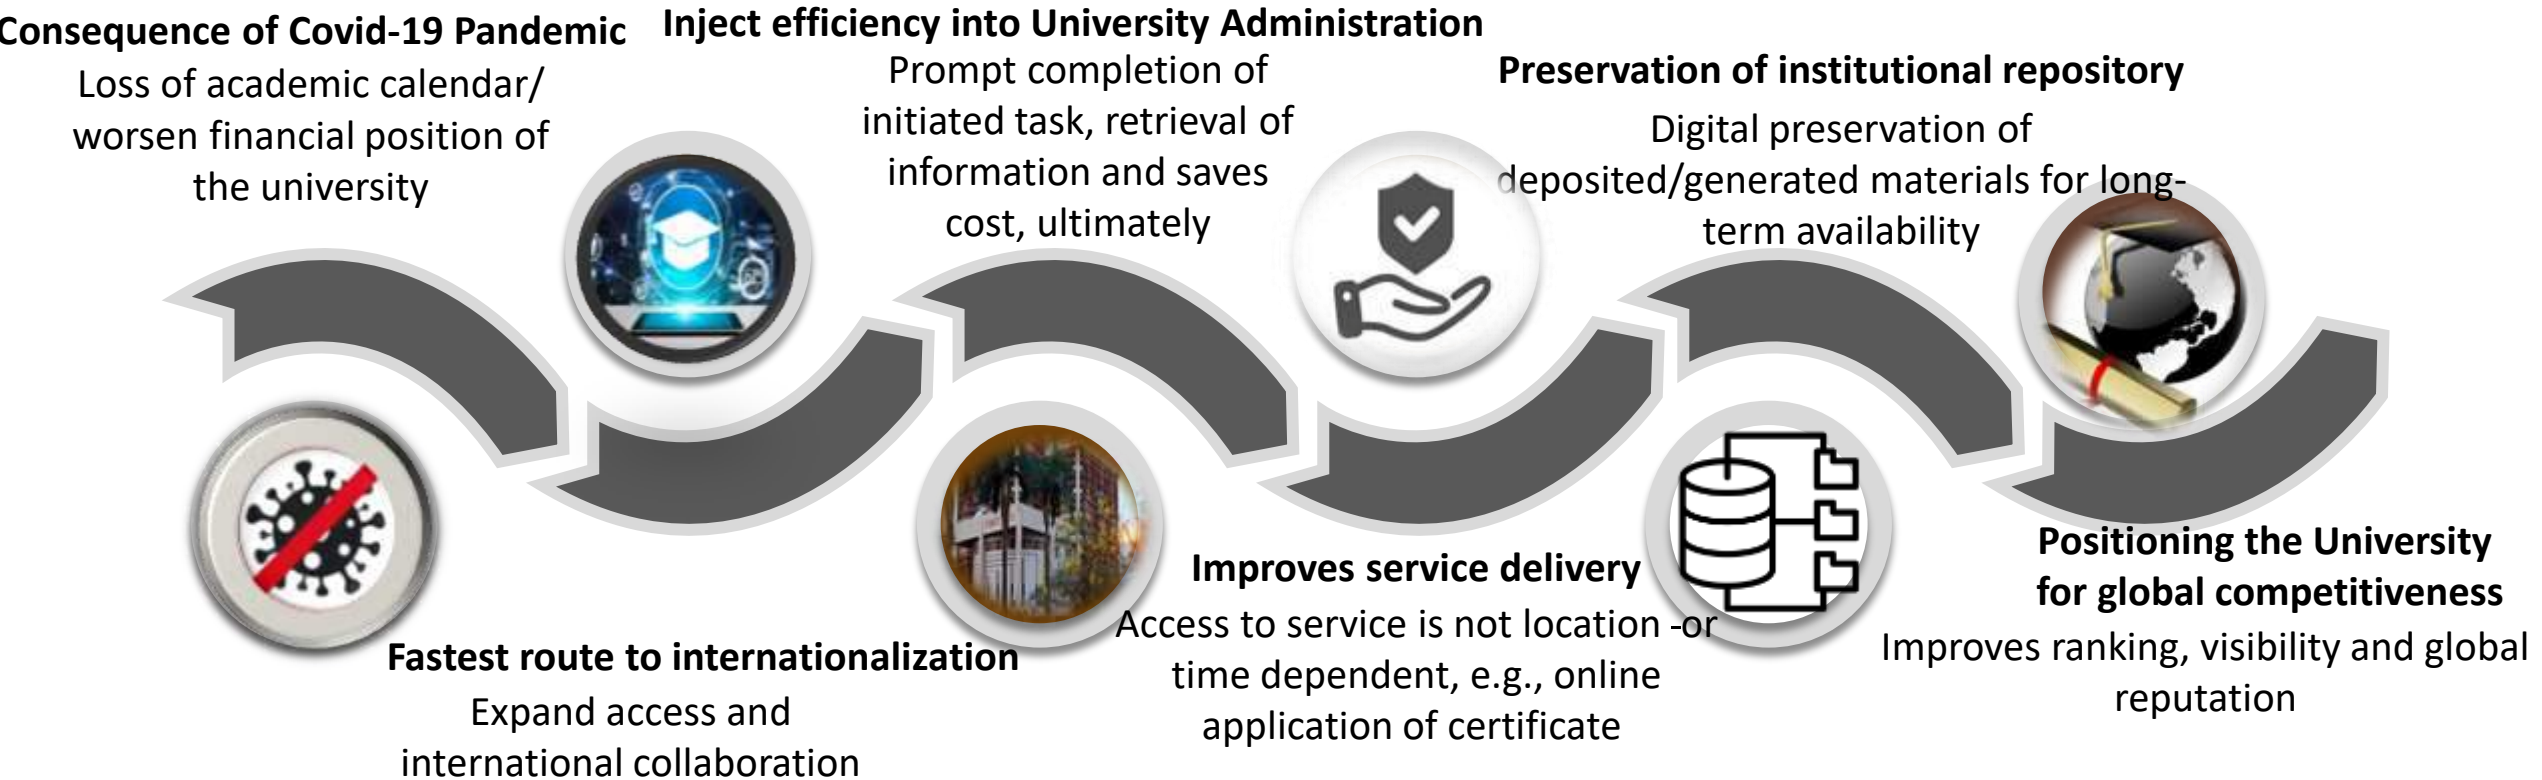

- 01 Online Teaching: the future of higher education
- 02 E-Administration: route to efficiency and improved productivity
- 03 Computerisation: automation of university processes and services for global competitiveness
- 04 Interaction and feedback

# ◀ Why are we here? ▶

It's about the imperatives of deploying technology to drive university processes and deliver services to all stakeholders in the higher education (UNILAG) enterprise

# Why deploy technology in the University?

**Automation does not take job away, rather it strengthens processes and delivers efficiency**

# Online Teaching/Learning

Before COVID-19 Pandemic, Online teaching was very limited globally, but the Pandemic took 1.5 billion students to online education.

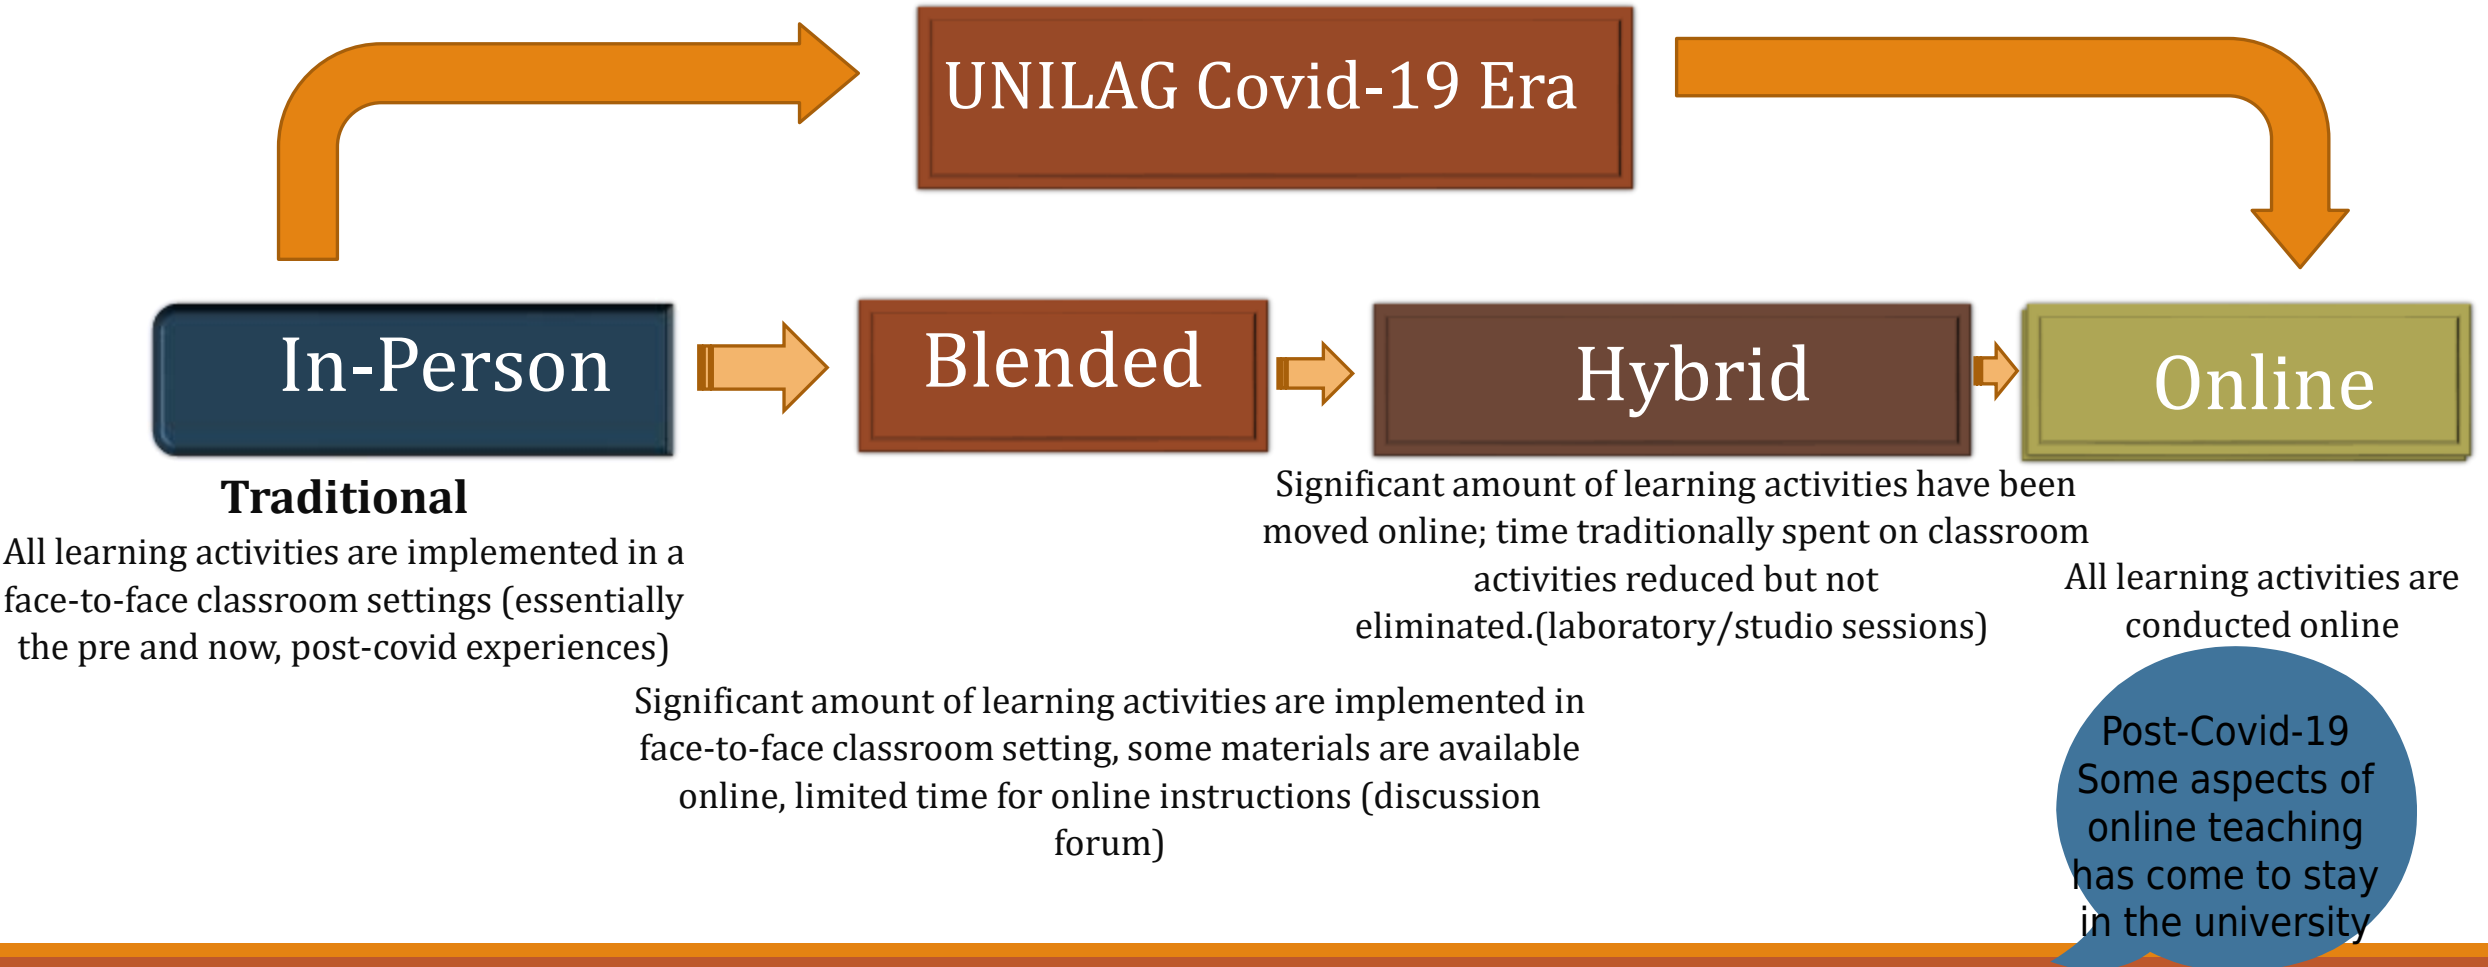

It appears that online teaching has come to stay and represents the future of education across the spectrum .

# Different Methods of Curriculum Delivery

---

Characterized by amount of time spent in physical space against online

# Challenges of online teaching/learning

Yes, online teaching/learning has enabled a new world for knowledge acquisition and dissemination;

Yet, penetration and adoption are bedeviled with challenges

# Challenges of Online Teaching

## Engaging Students

How do we ensure that students are not distracted?

## Communication challenges

How to build learners' intimacy and connection whilst addressing communication barrier (asynchronous learning challenge)

## Feeling lost

How can we quickly recognized lost learners and assist them rediscover themselves?

## Networks/Power/ Poor Tech Knowledge

In this part of the globe, inadequate infrastructure and low technology knowledge are obstacles to the adoption of online teaching

## Other challenges

- Technical difficulty with online learning tools
- Growing population of passive students

## Time-consuming resources/feeling of isolation

Data provisioning, overwhelming schedule and Computer technology addresses the challenges and techniques related

# Addressing Challenges of Online Teaching: Transitioning

01

## Purposes of Transitioning

Help both students and faculty see guidelines and principles that govern educational practices, funding, and regulations to improve learning outcomes and achieve educational goals.

02

## Strategies

Management and decision-making processes for educational institutions and systems to ensure effective administration and policy implementation.

03

## Activities

A wide range of activities to stimulate traffic and engagement with the new digital platform

## Purpose of Transitioning

### Faculty

- Move curriculum over and develop courses timely
- Learn and adapt to new technologies with minimal difficulty.

### Students

- Prepare students by providing orientation to new environment.
  - Provide opportunity for technical support when needed
  - Promote independent learning.
- 
- 

# Strategies for Transitioning

- Move lecture notes to online environment.
- Introduce students to online environment in face-to-face lab
- Provide resources on posting and other online best practices
- Add activities that would help students quickly adopt and adapt to online culture
- Shorten class time
- One may choose to eliminate one class per week.
- Activate online feedback and revisions before submitting assignments
- Assign collaboration assignment with other course facilitators
- Encourage more digital communications such as emails, chats, discussion forum, etc.
- And more significantly, set-up a community of practice particularly for faculty

 moodle

## Activities (Transitioning)

A wide range of activities to stimulate traffic and engagement with the new environment; these include:

- Discussion forums
- Article critiques
- Social forum or question forums
- Group problem solving
- Group reports
- Responding to hypothetical situations
- Peer editing
- Listing of resources

# Institutional Framework for Transitioning

- ▶ **Request for course migration process.**
- ▶ **Technical support and training (who, when, how)**
- ▶ **Pedagogical support and education (who, when, how)**
- ▶ **Course environment standards (navigation, colour scheme, required documents/resources, etc)**
- ▶ **Quality Standards**  
(review in the area of content, course design and instruction)

# Factors influencing choice of online Teaching Platforms

## Content and Content Management

01

Offer a wide range of undergraduate and graduate degree programs.

## Platform (Proprietary or Open Source)

02

Depends on needs, closed (bespoke) or collaborative

03

Ease of Navigation or third party application (Plug-in)

More than 800 platforms but 19 are very popular and common both in the open-source and proprietary categories.

Moodle, Blackboard, Canvas, Microsoft Education, etc.

# UNILAG LMS Platform

# UNILAG LMS Platform

The screenshot displays the UNILAG LMS Platform interface. At the top left is the UNILAG logo. The top right shows the user name "Muhammed Olawale H. Amuda" and a profile icon with the letter "M". Below the header is a navigation bar with "UNILAG-LMS", "User Login", and "My courses -" with a dropdown arrow. A search icon is on the far right. The main banner features an aerial view of the University of Lagos campus with a red overlay containing the text "University of Lagos" and "... the nation's pride". Below the banner is a section titled "My courses" with a horizontal line. It contains five course cards: "LMS TUTORIAL", "Phase Transformation in Solid", "Physical Metallurgy I", "Crystallography", and "Thermodynamics of Materials". Each card has a description and a red button labeled "Click to enter this course". A sixth card, "Failure & Material Selection Analysis", is partially visible at the bottom right.

**University of Lagos**  
... the nation's pride

## My courses

**LMS TUTORIAL**

Click to enter this course

**Phase Transformation in Solid**

This course provides learners with advanced knowledge of phase transformation in solids both in ferrous and non-ferrous alloys. It examines the tree classification of phase transformation in terms.

Click to enter this course

**Physical Metallurgy I**

This online version of Physical Metallurgy is an abridged version of the course to introduce students in Year 3 of a 5-year Metallurgical and Materials Engineering undergraduate programme.

Click to enter this course

**Crystallography**

Click to enter this course

**Thermodynamics of Materials**

Click to enter this course

**Failure & Material Selection Analysis**

This course exposes students to Failure Analysis and Materials Selection for Service. It content covers concept for failure both generically and contextually, who is a failure expert, tools for

# E-Administration

(deploying network resources and application software to drive administration with minimal human interference providing capacity for data logs and analytics)

## (Our Current Realities)

01

Analogue and Paper-based; document lost in transit

02

Turn-around time is extremely slow (at the minimum 72-hours)it has no respect for time exigency

03

Difficult to identify weak point in the process and service chain

04

Drains university resources/grossly inefficient (Huge expenditure on stationeries, not to mention personnel)

05

Incapable to provide real-time information/analytics about the university ecosystem

01

**Students  
Administration**

02

**Human Resource  
Management and some  
aspects of Bursary, E-  
procurement & Item  
module**

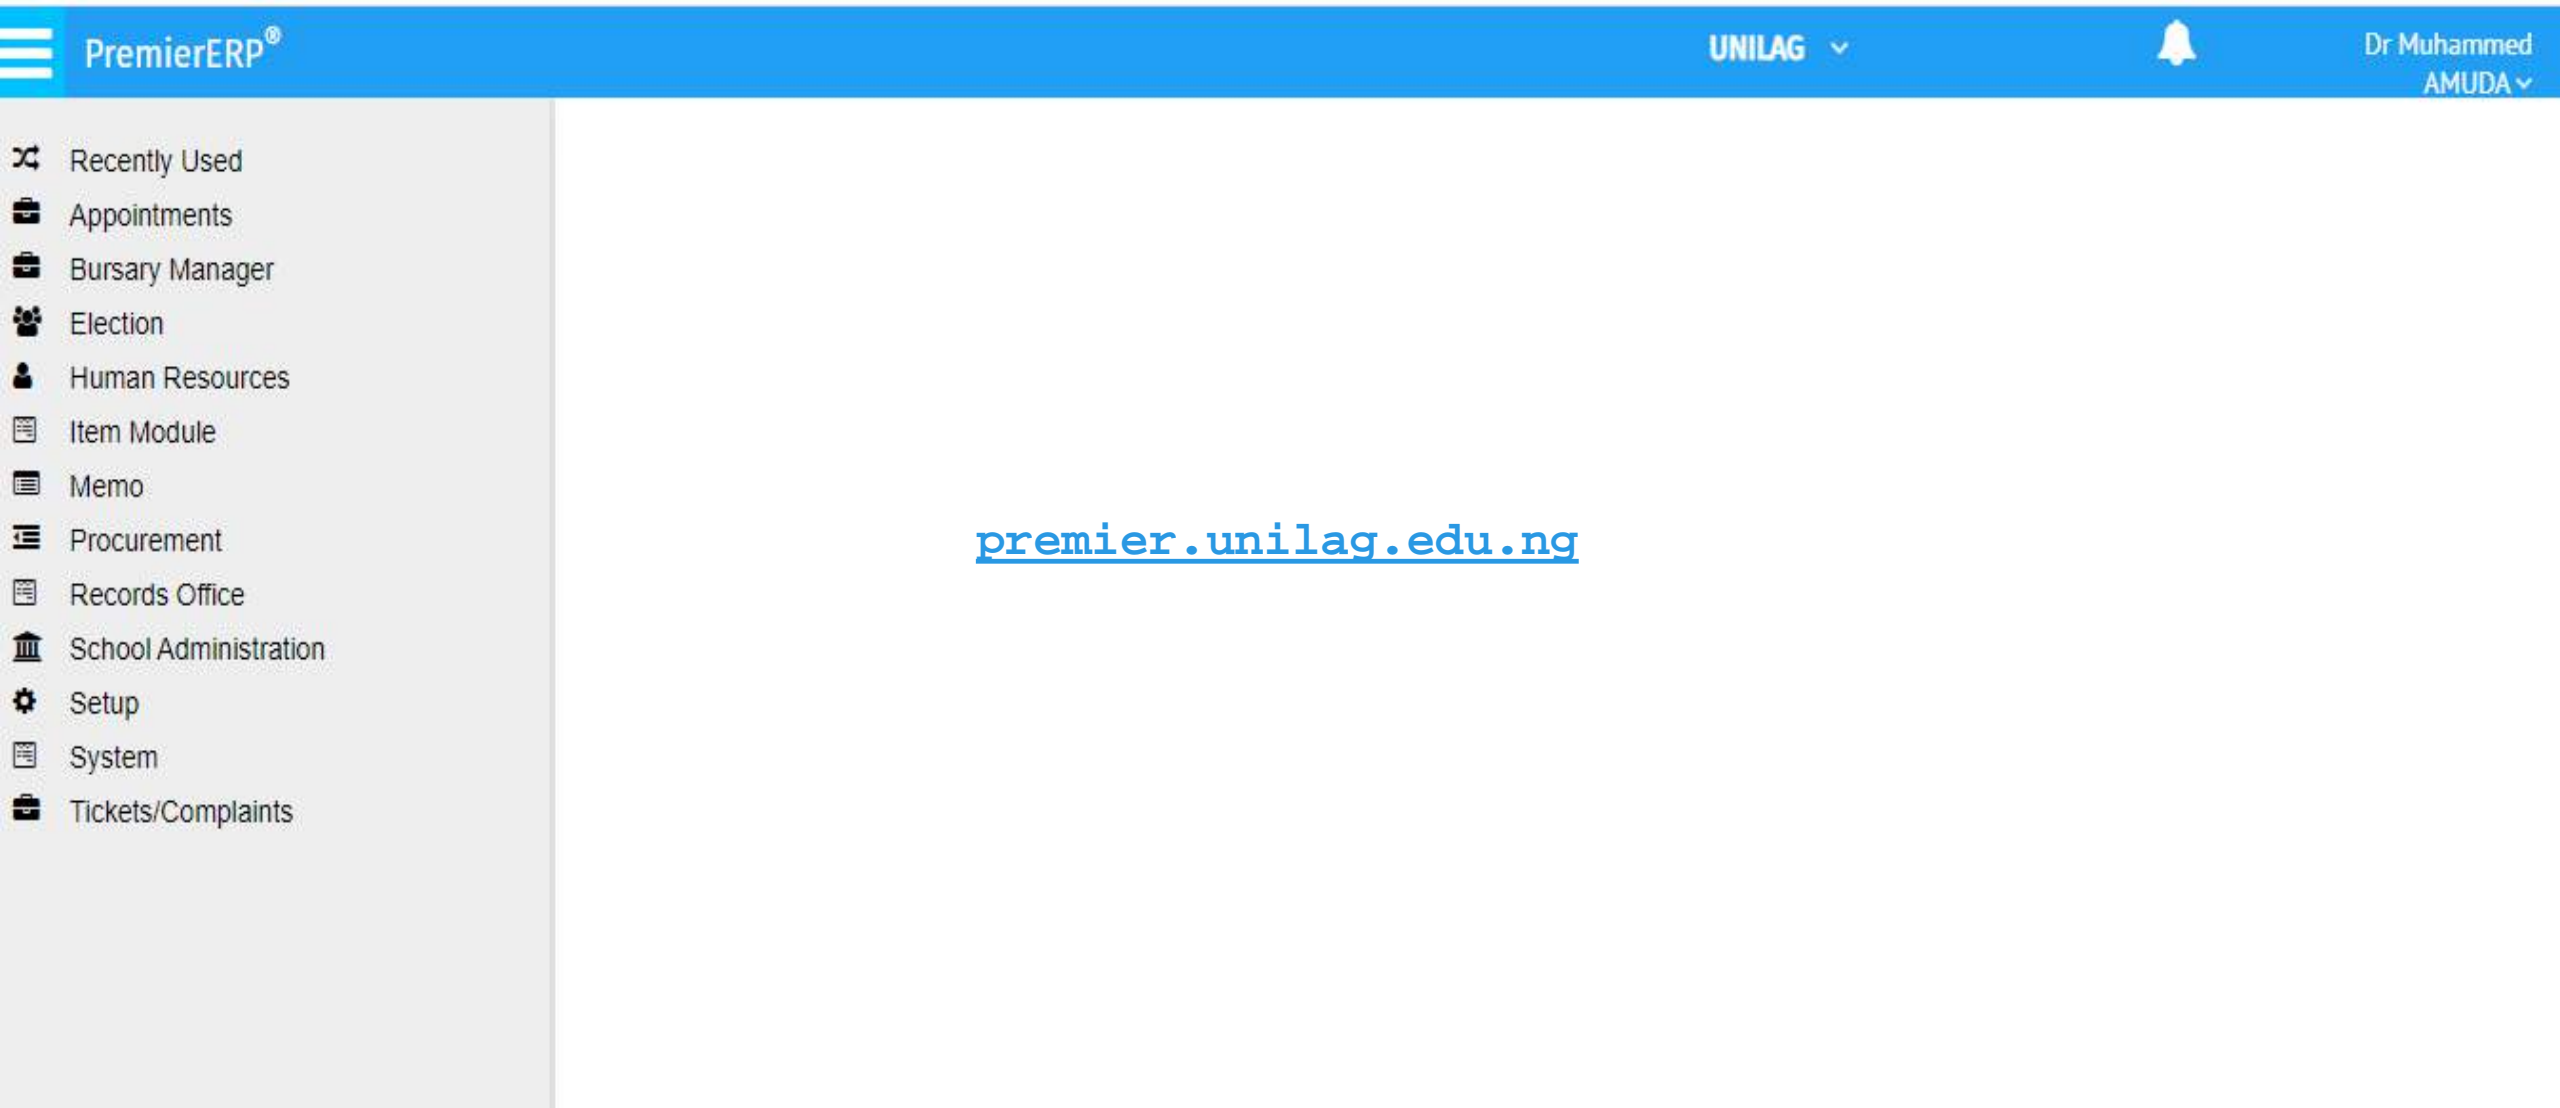

03

**E-memo and possibly  
e-minutes**

## Gradual deployment of E-Application (paperless initiative)

Some 6-7 years ago, a bit of e-administration was introduced with all aspects of students' administration (pre-admission screening, admission, registration, academic records, accommodation, students' election, etc.

# Premier Landing Page

# Automation of University Processes/Services)

Driven by internet accessibility than intranet (e-administration)

01

Multi-campus  
university  
without barrier  
and open  
governance

02

Facilitates  
internationaliza  
tion and  
improved quality  
of curriculum

03

Enable high  
capacity video  
conferencing and  
streaming

04

Improves efficiency,  
productivity,  
reduced cost and  
greater societal  
impact

05

Increase faculty  
reputation,  
quality and  
visibility for the  
University

# Considerations in University Automation Process

- Admissions and studentship lifecycle including registration, records, and academics
- Registry and administration including e-memo and e-meetings

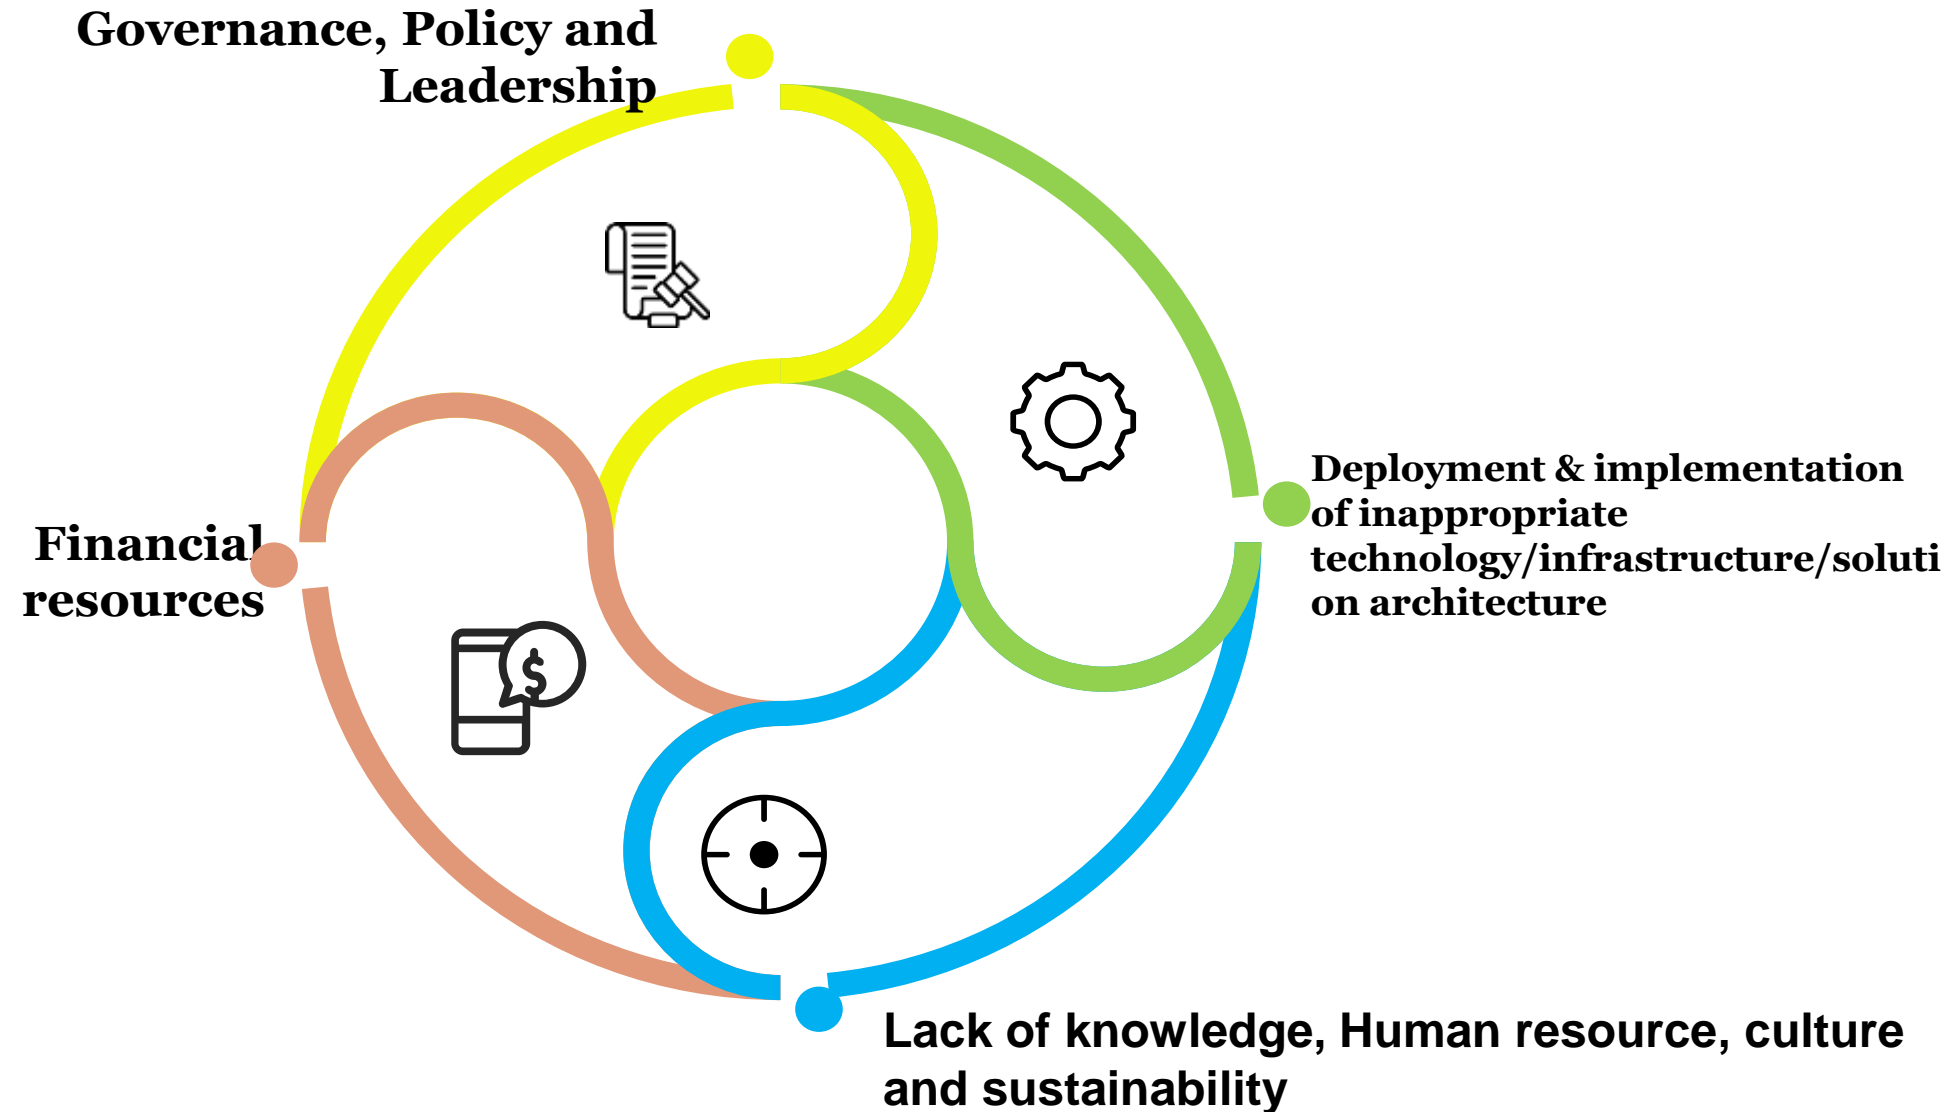

---

- Financial planning and accounting including grant management
- Full human resource planning and information system
- Academic Affairs and academic planning
- Student Affairs and hostel administration
- Student Accounts
- Information Technology & Security
- Facilities Management
- Business intelligence including data management and procurement
- Examinations management
- Medicals
- Interface with the public including regulatory bodies and corporate organisations

# Digital Transformation Paradigm for the University

# Automation Constraints

# Concluding Remarks

- Online teaching is the future of higher education (it is a gold-mine) but it must be properly transitioned into. Teaching units and the superintending Deans should as a matter of urgency kickstart a transition programme in their various faculties.
- To be globally competitive, UNILAG must automate and the process has started but before full maturity, e-administration particularly in memo, minutes of meetings, Bursary and HRMD should be explored and this should be enforced. Our current Premier ERP should be optimized.
- Our future is assured in a fully digitalized University of Lagos; and all of us as leaders in our various units have roles to play.

Thank You All for the  

---

opportunity to be part of this!
